

Fast2Test

Pass Your Next Certification Exam Fast!

Everything you need to prepare, learn & pass your certification exam easily.

365 days free updates. First attempt guaranteed success.

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Money Back Guarantee

Full refund if you fail the corresponding exam in 60 days after purchasing. And Free get any another product.

Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

We're not the only ones **happy** about Fast2test Practice Materials ...

62316+ customers in 100+ countries use Fast2test Self Test Engine. Meet our customers.

高效的考試材料是最高通過率的考試題庫

Exam : **HPE2-T33**

Title : **HPE Converged Solutions**

Vendor : **HP**

Version : **DEMO**

NO.1 A customer needs to frequently add servers to each remote location to facilitate new services. The customer plans to take advantage of the efficiency of visualization, but has insufficient IT staff to support the servers in all remote sites.

The customer needs simplification and to ease remote support tasks.

Which feature of a HyperConverged solution will address this customer's needs?

- A. a pre-configured, fully optimized VDI solution.
- B. a pre-racked chassis-based solution for highly efficient visualization.
- C. a solution optimized to provide a hybrid cloud infrastructure.
- D. a software-centric, fully integrated appliance-based solution.

Answer: A

NO.2 What is the HPE recommended best practice when determining the proper VM size in a Helion CloudSystem?

- A. Determine the maximum possible resource requirement and set that as the baseline.
- B. Let the user specify the compute, memory, and storage parameters at creation time.
- C. Create each VM with low resources and build each up as needed.
- D. Define a set of standard VM sizes that can be selected based on the user's needs.

Answer: A

NO.3 A customer is interested in using the analytics capabilities of the Microsoft Analytics platform. The customer needs a workload-optimized, factory-integrated, yet scalable solution.

Which HPE solution should the architect recommend to the customer?

- A. HPE Converged Architecture 700
- B. HPE ConvergedSystem 700
- C. HPE ConvergedSystem 500
- D. HPE ConvergedSystem 300

Answer: D

NO.4 When designing a VDI solution, what are two VDI-specific design factors that an architect must consider?

(Select two.)

- A. the type of clients: knowledge or power users.
- B. database preference.
- C. redundancy factor.
- D. over-subscription limits
- E. required compression ratio.

Answer: A,B

NO.5 Which guideline should be followed when choosing the proper converged system for a CloudSystem deployment?

- A. The Converged Architecture 700 should be used for fast deployments.
- B. The ConvergedSystem 700 is appropriate for solutions that need 2-16 nodes.
- C. The Hyper Converged 380 should be used for SMB scenarios.
- D. The ConvergedSystem 700 should be chosen when a flexible configuration is needed.

Answer: B
