

# Fast2Test

## Pass Your Next Certification Exam Fast!

Everything you need to prepare, learn & pass your certification exam easily.

365 days free updates. First attempt guaranteed success.

### Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

### 365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

### Money Back Guarantee

Full refund if you fail the corresponding exam in 60 days after purchasing. And Free get any another product.

### Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

We're not the only ones **happy** about Fast2test Practice Materials ...

**62316+** customers in 100+ countries use Fast2test Self Test Engine. Meet our customers.

高效的考試材料是最高通過率的考試題庫

**Exam** : **SAFe-ASE**

**Title** : SAFe Agile Software Engineer  
(ASE)

**Vendor** : Scaled Agile

**Version** : DEMO

**NO.1** In Agile, what is the typical format of a user story?

Response:

- A. A lengthy and detailed description
- B. A series of bullet points
- C. "As a [user type], I want [an action] so that [benefit/value]."
- D. A flowchart diagram

**Answer:** C

**NO.2** In BDD, what does the "Given-When-Then" (GWT) format represent in a scenario?

Response:

- A. A description of a bug in the software
- B. A sequence of steps that outline the preconditions, actions, and expected outcomes
- C. A list of developer tasks
- D. A summary of the sprint goals

**Answer:** B

**NO.3** What is the primary purpose of the SAFe Agile Release Train (ART)?

Response:

- A. Delivering value to the customer
- B. Managing technical debt
- C. Ensuring individual team productivity
- D. Optimizing resource allocation

**Answer:** A

**NO.4** What is the key benefit of having well-defined and detailed user stories in Agile development?

Response:

- A. It eliminates the need for sprint planning meetings.
- B. It allows the development team to work in isolation without collaboration.
- C. It ensures that the team meets all project deadlines.
- D. It enhances communication, reduces ambiguity, and helps deliver value to customers effectively.

**Answer:** D

**NO.5** Which of the following is NOT a common type of software model used in development?

Response:

- A. Class diagram
- B. Sequence diagram
- C. Pie chart
- D. Use case diagram

**Answer:** C

**NO.6** What is the course format?

Response:

- A. In-person classes only

- B. Online classes only
- C. A hybrid format with both in-person and online components
- D. A combination of written materials and self-study

**Answer:** B

**NO.7** What is the key benefit of creating a shared understanding through BDD?

Response:

- A. It reduces the need for user feedback and validation.
- B. It ensures that developers work in isolation.
- C. It leads to faster development with no need for communication.
- D. It aligns development with user expectations, reduces rework, and enhances collaboration.

**Answer:** D

**NO.8** What is the primary principle behind thinking "test-first" in software development?

Response:

- A. Write code first and then create tests to verify it.
- B. Create tests before writing code to guide development.
- C. Wait until the project is complete before writing any tests.
- D. Use automated testing tools exclusively.

**Answer:** B

**NO.9** What does "code quality" refer to in software development?

Response:

- A. The length of the code
- B. The cost of the development process
- C. The overall health, maintainability, and reliability of the code
- D. The speed of code execution

**Answer:** C

**NO.10** Which of the following is NOT a common aspect of code quality?

Response:

- A. Code readability and maintainability
- B. Code performance and execution speed
- C. Code security and vulnerability
- D. Code quantity and size

**Answer:** D

**NO.11** Which of the following is NOT a commonly used practice or tool for ensuring design quality in software development?

Response:

- A. Design reviews and architectural inspections
- B. Code smells and refactoring
- C. Usability testing

**D.** Writing code without considering design principles

**Answer:** D

**NO.12** Which SAFe role is responsible for maintaining and communicating the team's goals, progress, and impediments?

Response:

**A.** Scrum Master

**B.** Product Owner

**C.** System Architect

**D.** Release Train Engineer (RTE)

**Answer:** A

**NO.13** Which term is commonly associated with the practice of writing tests that will initially fail to guide development?

Response:

**A.** Regression testing

**B.** Test-driven development (TDD)

**C.** Code refactoring

**D.** Waterfall testing

**Answer:** B

**NO.14** Which type of testing is typically performed to assess code quality by identifying defects and vulnerabilities?

Response:

**A.** Integration testing

**B.** Code optimization testing

**C.** Unit testing

**D.** Security testing

**Answer:** D
